

Marysville Borough Sewer & Sanitation Committee
June 5, 2017
5:30 PM
Minutes

In attendance: Steve Copp, Dave Magee, Lance Barthel, Scott Weaver

Operators: Lonnie, Peter

Long Term Planning:
Flusher trailer

1. Sewer Separation Project

Scott reported the planning and financing of the project is coming along well. The project should be ready for bid by November if we can stay on track.

2. MS4 Permitting

Pennoni and borough employees continue to work on this project. Application will be in by August.

3. Mike Shalonis \$1000.00 Property Use (Paid)

Information only, Mike was paid the \$1,000 for damage to his property in the first sewer separation project.

4. Cam Spray (Flusher Trailer)

Scott presented information of three different bid/proposals for a flusher system that would work for the borough. The committee had a lengthy discussion and many questions. Scott tried to answer most of the questions and explained to the committee that we could set up a three year cycle for cleaning the entire borough every three years and the interceptor line. Saving the borough about \$10,000 dollars a year. The committee asked to put this line item on the finance committee agenda.

5. Pole Building

The committee discussed the pole building again and stated we would start smaller and be able to build on in the future. The discussion moved to start with plans for a 60 by 40 building with a concrete floor and then in the bid that we would put options for additional buildings and concrete. This line item will stay on the agenda to work on once the finance committee know what the funds remaining later in the year.
