Commission Reports on File

Brian Webster of the Marysville Fire Company announced the chicken barbeque will be held the second Saturday of each month.

Brian received a Briefing Guide for First Responders regarding Carfentanil-3, Methylfentanyl and Synthetic opioids. There is a significant threat to law enforcement personnel, and other first responders, who may come in contact with fentanyl and other fentanyl-related substances through routine law enforcement, emergency or life-saving activities. Since fentanyl can be ingested orally, inhaled through the nose or mouth, or absorbed through the skin or eyes, any substance suspected to contain fentanyl should be treated with extreme caution as exposure to a small amount can lead to significant health-related complications, respiratory depression or death. Law enforcement personnel and other first responders now need to wear nitrile gloves.
