

Marysville Borough
Sewer & Sanitation Meeting Minutes
July 6, 2020
2:15 PM

The Sewer & Sanitation Committee Meeting was called to order at 2:30 pm on Monday, June 1, 2020 at the Marysville Borough Office. Present were council members Brian Webster, Dave Magee and Steve Copp Also present were, Borough Manager Zachary Border, Borough Engineer Greg Rogalski, and Operator, Lonnie Sarver

New Business

1. Sink Hole Kings Highway

The issue of the sink hole has been going on for a while. The borough has opened up the road and attempted to fix the issue 3 or 4 times. The committee recommends opening up the road again and trying to find a solution. Zach will get with Ken and Rob to find a contractor to open the road and find the problem.

2. Borough Manager's Operators Class

Zach reported his class for his operator's licenses starts on July 27. It will be every Tuesday until Nov 4 when he will take the exam.

3. Phase III Rockville Estate

John Zervanos and Elliot Shibley were in attendance to answer the committee's questions about Phase III some of the concerns from the committee were fencing around the retention ponds, a fence around the cliff to the quarry and guiderails coming down to 11/15. John took notes on the concerns and will come back to the council meeting on Monday with some suggestions for council.

4. Belt Replacement

Lonnie reported that this was a maintenance issue that needed to be replaced every year and a half to make sure the press runs correctly This was recommended to be sent to the finance committee.

5. Underground Storage Tank Inspection

This is a requirement of DEP and was recommended to the finance committee.

6. COVID Testing

There was some concern from the committee as to what happens if COVID is found in our samples at the plant and whether our hurler would still take our sludge. Greg commented at this time it was not a concern but it would be good to have a plan just in case.

Old Business

1. Tapping Fee Increase

The study to increase the fees is ongoing.

2. Flow from the trailer park

Greg had come up with a plan to start with requiring a Sanitary Sewer Condition Assessment Report, prepared by a Professional Engineer which addresses our concerns. There is a large amount of Infiltration and Inflow entering the sewer system from their system. Give them 6 months to submit. Include a reference to something out of our codified ordinance, perhaps Section 18-319.17 (No roof drainage, surface water, waste from hydrants or ground water from underground drainage fields shall be admitted or be permitted to drain into the sewer system. The sewer system is intended to convey sanitary sewage only.)

The Committee was in favor of moving on with this plan and Zach would talk to Dan about next steps.

3. North Main Sewer Main Project Update

Lonnie reported ABLE was in to measure the line in the beginning of July and they found five (5) additional laterals but three (3) of them were not active and would not need to be cut out during the project. ABLE would be back out the week of the 15th to start lining the main.
