Long Term Planning:

Cleaning out the SBR's after Sewer Separation Project

Replace Mixer's

Replace Decanter's

New Business

PA American Water – Sean Shoemaker (717-364-4181)

Sean said the treatment plant generated nutrient credits that can be sold. Currently there are around 1,700 credits to be purchased. To sell the credits you have to setup an account on DEP's website. The paperwork takes approximately a half an hour to complete. If you don't sell the credits you lose them within the year. Credits have to be settled by November 28th. The borough's generators number is 412. The credits are governed by PennVest. Once you register your credits it goes on the DEP website. PA American Water would be interested in helping the borough and possibly buying the credits. They currently have four plants. Verification of credits must be submitted by Friday, November 8th. The committee agreed to have Lonnie submit the paperwork and to add this to the council agenda under work session.

Trevor Schubert - 222 S. State Road

Trevor said there was a brief period of water coming up through his drains in the basement. He made custom plugs to fix the issue. He was told everything was capped and completed. He said he received a call that the basement was flooding and water was coming up through the drains again. He wanted to know with the construction happening by his house last Monday to Wednesday had anything to do with this. Greg said no, all the contractors were doing was repaving the road. Trevor said the last few months his pipes are getting load and the toilets are leaking and he had to turn them off. He said he contacted Suez and they told him to get a regulator. Trevor feels is getting nowhere with Suez. Trevor asked about the pump station and Greg said that is for the sewer only. Lonnie said he would stop down and put die in the lines to see what happens.

Old Business

Upgrades at Pump Station #2

Generator Pad - \$10,000.00: The committee agreed to place this on the Council Agenda

Generator - \$25,500.00: The committee agreed to place this on the Council Agenda

Sewer Main along River
Tabled until 2020

Other Business

Public Comment

John Fasnacht of 21 North main Street asked why there is a white X down by one of his maple trees? Lonnie said that is an area where tree roots are in the line.
